BCom Information Systems

2019 - 2022 Experience Letter

27 February 2023

Dear 18twenty8

I write this letter to express my gratitude for your support during my undergrad years. I studied BCom Information Systems and was part of your programme since my first year in 2019.

Your assistance helped me achieve a Bachelor's degree with good grades. The sponsorship helped with tuition fee for my studies as I was having difficulty with finances, which was resulting in worrying about how my fees were going to be settled instead of focusing on my studies.

The sponsorship also made sure that I had study materials by providing textbooks, stationery and, not forgetting, my "beast" of a laptop (HP i7 8GB RAM) that I used to complete my assignments, tests and to improve my coding skills.

I also received a meal allowance to buy food throughout the years so that I never slept or studied on an empty stomach.

My personal experience with 18twenty8 has been remarkable and a very helpful one. A huge thank you to 18twenty8 for all the help you have provided.

I have now graduated and found a job at a blue-chip company in South Africa and this was made possible by your guidance.
