

2023 BURSARY EXPERIENCE LETTER

MAHLASE LEBATO CHARLENE

NOBEMBER 2023

BA (Majoring in Psychology)

I hereby write this letter as an expression of appreciativeness to have been chosen as one of the bursars of 18twenty8 throughout my varsity years. 18twenty8 has been funding me from 2021, when I was doing my second year up until today, as I graduated. They have provided me with financial and emotional support throughout.

In addition to receiving financial help that has allowed me to pursue my academic objectives, 18twenty8 has provided me with exceptional emotional support during my time as a bursar. The program was able to get me a sponsor who helped with tuition fee, of which is a very critical issue to every student who want to pursue their dream. I have always had the difficulty of getting a sponsor or a bursary to fund the program I was doing and that resulted in me stressing rather than focusing on my studies and doing more, and that has also demotivated me to do better. On top of being awarded the opportunity to be a bursar, they provided me with study materials such as book allowance, stationery and a laptop to be able to write my assignments, tests and submit on time. I also was provided with a food allowance throughout the years so that I do not study on an empty stomach or rather sleep with no food. Lastly they were able to pay for my accommodation during all the years of my studies.

I am forever grateful for being given an opportunity like this and honestly, my experience has been momentous. Big thanks to 18twenty8 for assisting me with the necessities I had, I have now graduated and going back to further my studies next year, and I hope that my journey with them will not end here.
