Phumzile

18twenty8

This is Phumzile Moloi a 25-year-old lady who has a passion of being a hair stylist. I was able to pursue my dreams at Hydro International College with the help of getting a bursary from 18twenty8.

I didn't have any funding and 18twenty8 started paying for my fees so I could go to college to study hairdressing. I used to do people's hair at home. After going to school, I saw all the other techniques and getting all the experience.

Getting a laptop from 18twenty8 helped me a lot. I could get my assignments done quicker. It made my life easier.

Unfortunately, I could not attend the events I was invited to because during the week I used to attend classes then Friday and Saturday I had to work at a local salon to cover practical hours for school. But I would have loved to attend the events to gain experience.

I am grateful to 18twenty8 for funding my studies and taking a chance on me, and because of them I graduated as a hair stylist and I am hoping to continue with my studies in future.

Phumzile.
