

My experience with 18twenty8...

My name is Khanyile Remoratile Madubanya and I just completed my BSc Biological Science undergraduate degree in 2023 at the University of the Witwatersrand. 18twenty8 funded me from my first year right through to my final year and I am eternally grateful. They funded me at a time where I had given up on finding a bursary after numerous rejections throughout my first year. My experience has been amazing, the financial weight of university was lifted off my shoulders which enabled me to direct my full focus to my academics making the experience less stressful. I was able to introduce my friend Lesedi Forane to the organisation after she had also been struggling with funding. It was a pleasure being a beneficiary because of what 18twenty8 stands for “empowering young women personal development through education” which is in line with my beliefs in creating empowered women who can later empower others.
