

18twenty8 Experience Response Letter

I applied for the Financial Assistance Programme because I was facing significant financial difficulties which threatened to derail my academic pursuits.

The programme has helped me immensely not only did it offer financial assistance, but it has also gone above and beyond in assisting me holistically through their mentorship programme and counselling services and the sessions that we would have before exams offering more support and help.

Through the programme I have received essential financial support which helped me continue with my studies from (2022, 2023 – 2024) without having to worry about finances. Moreover, the mentorship programme provided me with invaluable guidance and support. My mentor helped me significantly, from constructing a CV to offering academic tips. She has also helped steer me in the correct path when it comes to choosing my honours and career path. Through regular meetings and open communication, my mentor has fostered a supportive space for me to discuss my goals, aspirations, and challenges, not only academic challenges but also personal ones.

My future plans include pursuing an honours degree, and with my BA degree I would really to venture into the media space become a communications officer for multinational corporations such as Amazon. Alternatively, I'm also drawn to a career in diplomacy or working with international humanitarian organizations such as the UNICEF.
