

I applied to your Financial Assistance Programme because I needed financial assistance to complete my studies. The programme helped me because of the support offered. 18twenty8 was always present from the beginning of Honours right until the end.

I received financial assistance in the form of my studies being fully paid as well as a monthly allowance. I received support in the way of a very lovely and supportive mentor, her name is Ronelle Bester. There were check-in meetings and a new laptop was bought for me to complete our studies.

My future plans are now to focus on my career, as I started a new job it is an environment I have been wishing to work in. I plan on using my Honours degree to open more doors to various opportunities as it provides a competitive edge in the job market. Hopefully in future I will also get the courage to continue my studies and pursue a Masters' or PhD.

I encourage other young women to continue studying. People should also look out for programmes that can assist them to complete their studies. Being in a situation where you do not have the finances to further your studies should not define you because there are programmes like 18twenty8 that provide great assistance.

I truly recommend this programme to other young females. There is no limit to education and you should never allow situations to limit you because the world is your oyster.

Thank you for providing me with this programme. May it grow and prosper and continue to help other young females who are passionate about their studies.
